

Leopards Creative

Tasks

It has been such a lovely week being back at school with all of Leopards class. They all came back ready for learning and have worked incredibly hard this week.

To celebrate British Science Week we had lots of fun creating a Wildlife Estate Agency where children worked in groups to match animals to their habitat based on how the animals are suited to their environment. Once the animals were correctly matched they were able to purchase their new habitat home!

The children also made their own worry dolls linked to the story Silly Billy by Anthony Browne using a wooden peg.

In maths we had lots of fun exploring and investigating 2D shapes. We had the challenge of trying to fit a square back together after it had exploded!
