

I have chosen to be a Parent Governor because I want to contribute towards the future of the school which in turn will benefit the children's lives and will provide them with the best educational opportunities. Having my children attend Thornhill Primary means that it is something I feel passionate about, making sure that not only my children, but all the children succeed beyond their expectations. Thornhill Primary is already a thriving school and I would like to help to continue this into the future.

I love being a father to my two daughters and have met many wonderful parents at the school as I am there most days along with other parents on the school runs.

My previous jobs I believe, will help me in the role as a governor. Prior to being self-employed, I worked in numerous industries including leisure, where I worked more closely with groups of children in roles such as a Party Planner and also in teaching gym and athletics based classes within a busy London leisure centre.

I believe that a Governor should be the voice for the parents and carers of our children, someone who is approachable and proactively trying to support both the school and the parents together.
